BioGuard® is a unique antimicrobial agent, permanently molded into the “wet” components of the garbage disposal to eliminate bacteria-caused odor. It also inhibits the growth of a wide range of microorganisms.

Key Features:

- Continuous feed
- Silver Shield prevents silverware from falling through the drain
- Septic system safe
- Permanently sealed bearings
- Stainless steel grind ring
- Balance turntable & armature shaft
- Cast stainless steel swivel impeller & cutting mechanisms mean no rust
- Insulated, whisper-quiet motor reduces sound
- Thermoset polymer drain housing
- ABS hopper & manual reset
- Hardwire or plug-in friendly
- Includes factory installed power cord

DSA-WD5000

Two-Piece Push Button Flush Toilet

KEY FEATURES:

- Siphonic
- Size: 29-1/2" x 16-1/2" x 30-3/4"
- 1.28 Gpf single flush toilet
- Round bowl
- Standard 12" rough-in
- Wax ring and bolts included

KITCHEN FAUCETS

USF-12KPO00

COLOR OPTIONS

Features

- Kitchen faucet
- Material: 304 stainless steel
- Handle: zinc alloy
- 1 Function ABS spray head
- Wanhai ceramic cartridge
- Two 20" 304 stainless steel braided hoses
- Nylon pull-out hose
- cUPC Certified

Flow Rate

- 1.5 gpm @ 60 psi

DF322POK

USF-16KPO00

COLOR OPTIONS

Features

- Kitchen faucet
- Brass Construction
- Ceramic Disk Cartridge
- Flexible supply lines with 3/8" or 9/16" compression fittings
- Red/Blue Temperature Indicators
- cUPC Certified

Flow Rate

- North America: 1.8 gpm max @ 60 psi
- California: 1.8 gpm max @ 60 psi

USF-16KPO01

COLOR OPTIONS

Features

- Pull Out Kitchen Faucet
- Brass Construction
- Ceramic Disk Cartridge
- Flexible supply lines
- cUPC Certified

Flow Rate

- 1.5 gpm @ 60 psi

Features

- Tub Filler with Hand Shower
- Valve material: solid brass
- Zinc handle
- Ceramic disc cartridge
- Neoperl aerator
- Supply hose: stainless steel braided hose (3/8" x 31.5" long)

Flow Rate

- Hand shower: 2.5 gpm @ 80 psi
- Valve: 7 gpm max @ 45 psi

Acrylic Tub Warranty

3 Year Limited Warranty on Acrylic Parts

*Excludes excluding plumbing fittings, labor charges & damage incurred during installation or mishandling.

Faucet Warranty

Lifetime Limited Warranty from Manufacturing Defects

*1 Year Limited Warranty on Replacement Parts

*Excludes labor charges or damage incurred during installation or mishandling.

Garbage Disposal Warranty

Lifetime Limited Warranty on DSA-WD5000

*Excludes change of ownership, labor charges or damage incurred during installation or mishandling.

Garbage Disposal Warranty

10 Year Warranty on DSA-WD3000 and DSA-WD2000

*Excludes change of ownership, labor charges or damage incurred during installation or mishandling.

Porcelain & Fire Clay Warranty

Lifetime Limited Warranty from Manufacturing Defects

*Excludes labor charges or damage incurred during installation or mishandling.

Quartz Composite Warranty

Lifetime Limited Warranty from Manufacturing Defects

*Excludes labor charges or damage incurred during installation or mishandling.

Stainless Steel Warranty

Lifetime Limited Warranty from Manufacturing Defects

*Excludes labor charges or damage incurred during installation or mishandling.

Toilet Warranty

Lifetime Limited Warranty on Replacement Parts

*Excludes labor charges or damage incurred during installation or mishandling.

Brushed Nickel Finish Care Instructions

Use a damp cloth to remove light dirt

Dampen a soft piece of cloth with clean water, and wipe down the surface of the faucet daily to remove dirt before it accumulates. Use a cotton ball sprayed with glass cleaner to clean the base of the finish or any hard-to-reach areas. Make sure the glass cleaner does not contain ammonia or alcohol.

Scrub away hard water stains

Spray a soft cloth with a mixture consisting of equal parts water and vinegar. Use the cloth to scrub away heavy water stains on the nickel finish, or to remove built up dirt.

Rinse the finish

Rinse the finish with a clean, damp cloth after cleaning it with the glass cleaner or vinegar cleanser. Rinse out the cloth as needed to rid it of the residue of the cleansers, dampening it again to continue rinsing the finish. Dry the finish with a soft dry cloth.

Wax the finish

Return the shine to the finish by spreading a layer of paste wax over the finish. Waxing is required about every four weeks. Spread the wax using a soft dry cloth, working it over the surface of the nickel in a small circular motion. After covering the finish, buff it to a shine using another dry soft cloth.

WARNING

- Avoid bleach.
- Do not use cleaners that contain alcohol or ammonia to clean brushed nickel.
- Abrasives should never be used, as they may affect the finish.
- Acidic substances left on the nickel finish for extended periods of time may leave a slight dark mark, but this is easily removed with a chrome polish.
- Do not use abrasive cleaning pads.
- Never leave rubber mats, sponges, towels, or cleaning pads in the sink overnight as this will trap water and could stain and discolor the sink surface.

Porcelain Care & Cleaning Instructions

STEP 1: Gently clean with liquid soap and dry.

- Using warm water, liquid soap, and a sponge, gently clean the porcelain sink. Remove any food, soap, or toothpaste build-up from the surface. This will allow you to identify any stains or scuff marks that require a deeper clean. Wash away all soapy residue, and dry with a dish towel.

STEP 2: Skip scrubbing, and remove discoloration using bleach on white porcelain and hydrogen peroxide on colored porcelain sinks.

- Harsh scrubbing can damage porcelain, so your first line of attack should be the least abrasive. For white porcelain only, bleach can be used to remove stains; never use chlorine bleach in colored or vintage porcelain, as it can damage the finish. For both white and colored porcelain, liquid oxygen bleach (such as hydrogen peroxide) is a good alternative. It may take longer to work, but is less caustic and more environmentally friendly.
- Pour the bleach product suited to your type of porcelain into a spray bottle. Cover your sink with a layer of paper towels. Spray bleach or oxygen bleach over the towels, allowing it to soak in thoroughly, and let sit for 30 minutes to an hour. Discard the bleached paper towels, and rinse sink completely with clean water. If concerned about putting any kind of bleach on an antique porcelain sink, use white vinegar instead. Add undiluted white vinegar to a spray bottle and spray the sink, then use a non-abrasive sponge and circular motions to clean the porcelain. Rinse thoroughly with water. If the stains don't lift completely and you decide to try oxygen bleach, remove all traces of vinegar first to avoid the harmful side effects of combining vinegar and bleach.

STEP 3: Tackle deeper stains with a mild abrasive.

- If you don't feel comfortable using bleach, try lifting stain with a gentle abrasive. There are many abrasive cleansers on the market, and not all are designed for porcelain. One safe and effective liquid is Bar Keepers Friend®. Squirt a small amount into the sink and gently scour the surface with a non-abrasive sponge. Its oxalic acid will lift stains, but be sure to use the product sparingly or risk discoloring and scratching your porcelain.
- Lift metal stains with a little bit of acid or naval jelly.
- Tackle silverware stains and orange/red rust separately, using these methods: Add a few drops of lemon juice or white vinegar directly to a metal stain. Do not mix acids! Let sit for several minutes, monitoring the color of the stain. Do not scrub. Remove with water. For rust stains, use Naval Jelly®. Apply a thin coat to the stained area, monitor carefully, and rinse as soon as you notice a change in the color of the stain. Naval Jelly® is primarily used to remove rust from metal, so exercise caution and rinse it quickly from porcelain as soon as the stain lifts.

Copper Care Instructions

DAILY

- When you finish using your sink, adopt the simple rinse and wipe method. When water dries, it often leaves behind unsightly calcium stains, which may alter the appearance in an undesirable way. In addition, when food is allowed to sit on the surface of the sink, any acids within the food can alter the finish. So just remember to rinse with water and wipe with a dish towel.

NOTE: Since copper is a natural anti-bacterial surface, it is not necessary to disinfect or scrub your copper, since the sink does it for you.

WHEN NEEDED

- If you feel the surface has lost its luster, use a clear mild non-citrus liquid dish soap with a no-scratch sponge to gently scrub the entire surface. Rinse with water and wipe with a dish towel.

NOTE: you may notice some brown spots on your sponge when you do this. Do not worry, it is perfectly normal. You are scrubbing off some of the patina that has built up over time. To further enhance the beauty of the finish and add an extra layer of protection from food related acids, this is a good time to use wax.

CARING FOR LIGHT SPOTS

- If something strips the patina, do not worry, your copper surface has a living finish. The patina will naturally regenerate with time. The best thing to do is clean the area with clear mild soap and no-scratch sponge to remove any remaining acid or chemical. Do not wax the sink until the spots have darkened back with natural patina. The more water and oxygen that come in contact with the raw spots, the faster they will patina. Waxing will slow the natural darkening process as it protects the surface from the environment. Use your sink as you normally would and you will notice the spots will darken and blend back into the sink.

AVOID

- All cleaning products that contain abrasives, ammonia, bleach, and alcohol. All will strip the patina and expose the raw copper.

Quartz Composite Sink Care & Maintenance

Quartz sinks are designed to meet the demands of modern living. Follow these general instructions to care for and maintain your quartz sink.

CLEANING

- Clean your quartz sink regularly using a non-abrasive sponge and dishwashing soap. Rinse and dry completely with a clean, soft cloth.

SURFACE LUSTER

- Clean, rinse and dry sink completely. To restore luster and extend the time between cleanings apply a thin, even coating of Quartz Sink Conditioner, food-safe mineral oil, or olive oil to the entire sink surface with a cloth. Remove excess with a cloth or leave overnight. Reapply as needed.

REMOVE SCUFFS AND STAINS

- Use a magic eraser sponge to remove light scuffs, stains, and metallic marks. On stubborn areas use a soft scouring pad and mild abrasive cleaner (Soft Scrub® or Bar Keeper's Friend®). Clean, rinse and dry sink completely then apply Quartz Sink Conditioner.

SURFACE DEPOSITS

- To remove hard water, calcium or lime use Lime Away® or CLR® cleaner. Alternatively use white vinegar on a paper towel and rinse after 20 minutes.

TIPS

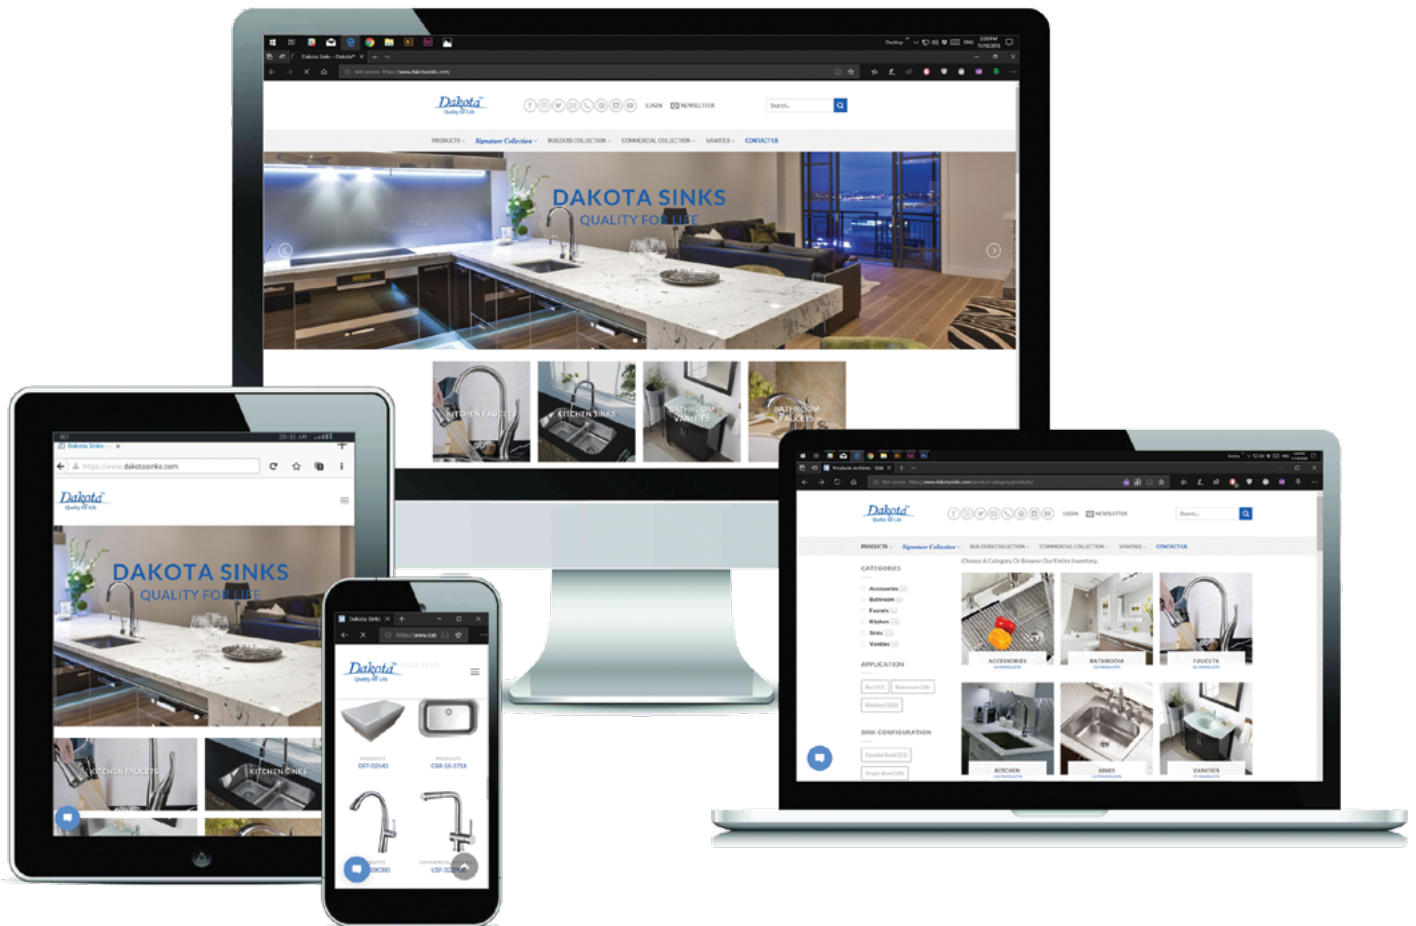

- Quartz sinks are versatile and durable. However, no sink is scratch-proof. Take care when handling heavy objects and ceramicware in the sink. Use the optional protective bottom grids(s) and regularly clean the sink and apply Quartz Sink Conditioner or olive oil to ensure years of enjoyment and service in your home.
- Metallic surface marks occur when small amounts of metal from utensils and pots & pans are removed when rubbed across the high harness quartz surface. Such cosmetic marks are most visible on light colored sinks and can easily be removed with a magic eraser sponge. Use the optional protective bottom grids(s) and regularly clean the sink and apply Quartz Sink Conditioner or olive oil to ensure years of enjoyment and service in your home.

DO NOT use abrasive cleaners, abrasive scouring pads, metal-scouring pads, bleach or alkali cleaners such as ammonia, and do not use the sink for cleaning paint or grout materials. If you encounter staining liquids, such as dyes or juices, rinse off as soon as possible.

- If a color-matched disposal flange is installed it should be removed periodically and cleaned with a non-abrasive sponge and dishwasher soap.
